1120 Stakeholders

We are pleased to announce that we are posting the first draft of the Tax Year (TY) 2006 XML schemas (version 2006v1.0) that we refer to as Release 4.0 on our website. These schemas focus on the new tax year form and tax law changes that have occurred. Publication 4162, Modernized e-File Test Package for Forms 1120/1120S For Tax Year 2006 will be published on the website by the end of August. We anticipate Assurance Testing (ATS) to begin November 6, 2006.

XML Schemas

The schemas we are presenting today are the first draft of Tax Year 2006 XML schemas for all 1120/1120S/7004 forms and schedules (new version 2006v1.0). The schemas are posted in the **ATS System** table on the current valid schema chart posted to irs.gov at <http://www.irs.gov/taxpros/providers/article/0,,id=97626,00.html>. Also included are the "Diff Files" that show the changes from the previous schema versions. The **Production System** table contains the current valid schemas for Forms 1120, 1120S and 7004 that are still being used to process TY 2003, TY2004 and TY2005 tax returns and TY 2005 timely-filed extensions.

Please note: The Instance Document contained in the schema files is viewable with any generic MIME-reader. Found within the 1120 folder, the Instance Document contains an example 1120 transmission.

Business Rules

Release 4.0 Business Rules for TY 2006 (new version 2006v1.0) are posted in two different formats that contain identical information – Adobe (.pdf) and a comma-separated file (.csv). A column within the file identifies changes made from the last posted version to help clarify what changes were made. The new business rules are posted in the **ATS System** table on the current valid schema chart posted to irs.gov at <http://www.irs.gov/taxpros/providers/article/0,,id=97626,00.html>. As with the XML schemas, current valid Business Rules for TY 2003, TY 2004 and TY2005 are shown in the **Production System** table.

Key Changes

The following forms have been added in XML for TY2006:
